

The Transparency Awards Criteria

At this time, there are a set of 241 criteria that flesh out the five pillars of transparency. The “Five Pillars of Transparency” include:

1. Accessibility

Readers can quickly find pertinent information in a document and information is presented in a manner that is easy to digest.

2. Precision

The disclosure prioritizes thoughtful reporting and includes critical information beyond requirements of compliance that helps readers understand the company.

3. Comparability

Information is summarized appropriately and presented in a way that facilitates comparisons across companies and against readers’ own guidelines, criteria and expectations.

4. Availability

Readers can easily find the document(s) they want in the format and language they need.

5. Clarity

Writing is in clear, plain language so that disclosures are immediately understood by the reader.

The independent Transparency Scientific Committee meets every year to determine what changes should be made to the objective criteria used during the prior year.

If you want to learn more about each of these criteria, we recommend that you sign up to get our blog pushed out to you by email, as we provide practical guidance – and examples of good disclosure – all year long on that blog, by simply inputting your email address into the “Subscribe” form in the right column of the home page of this blog.
